

# Automated Dispensing Cabinet Distribution

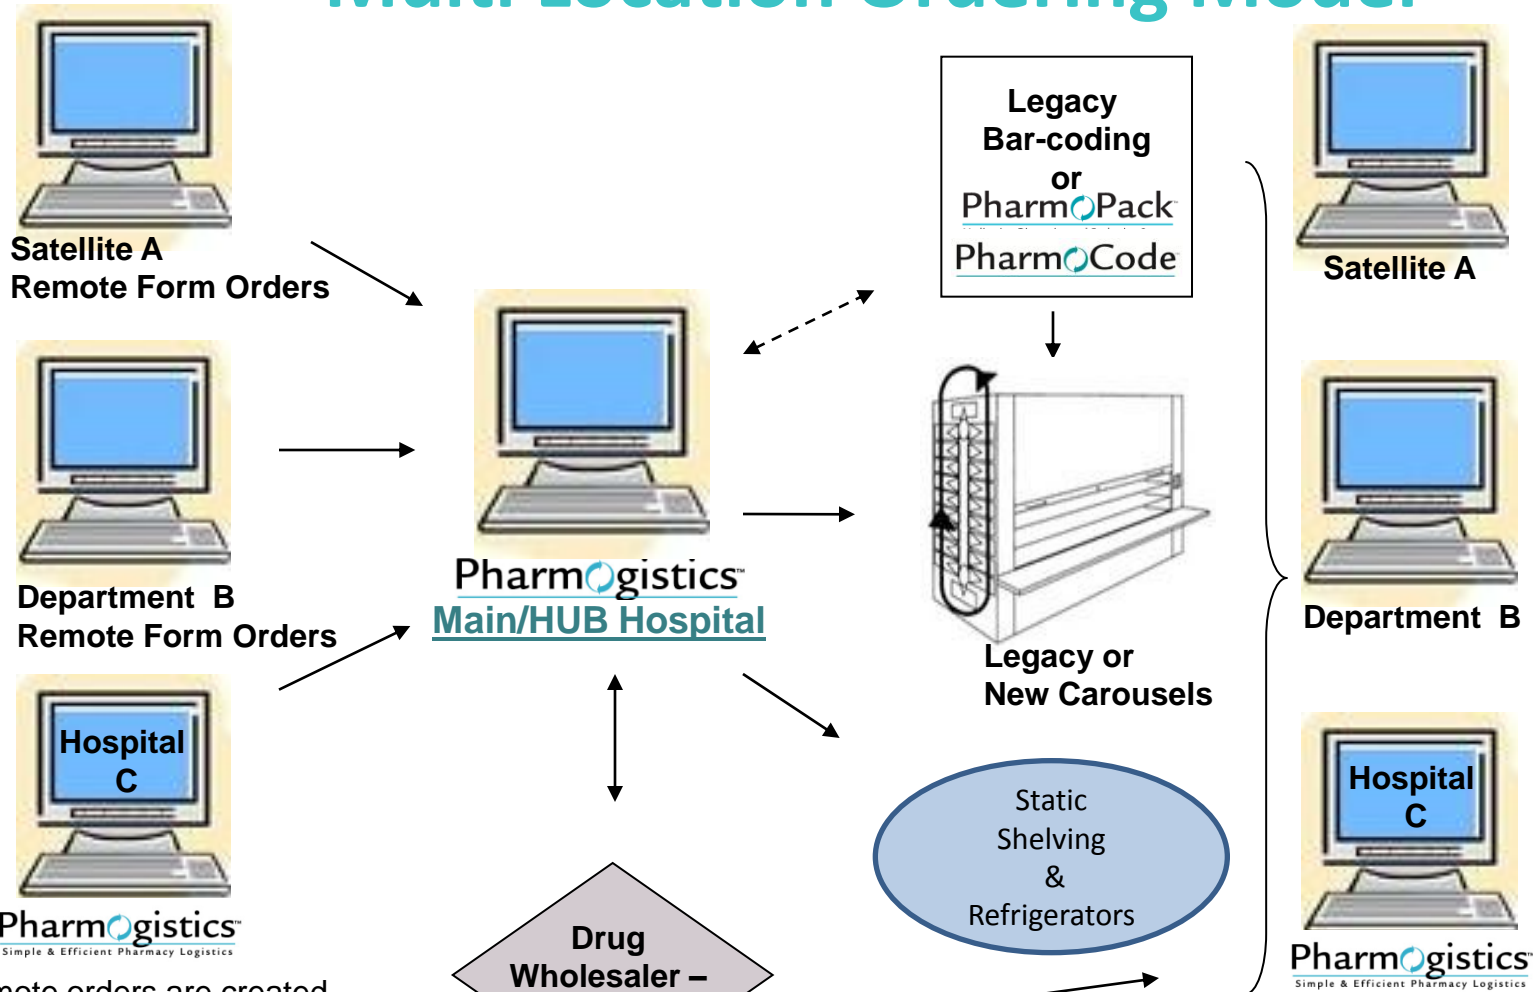

# Patient Cart-fill Distribution

# Multi-Hospital Distribution

# Multi Location Ordering Model

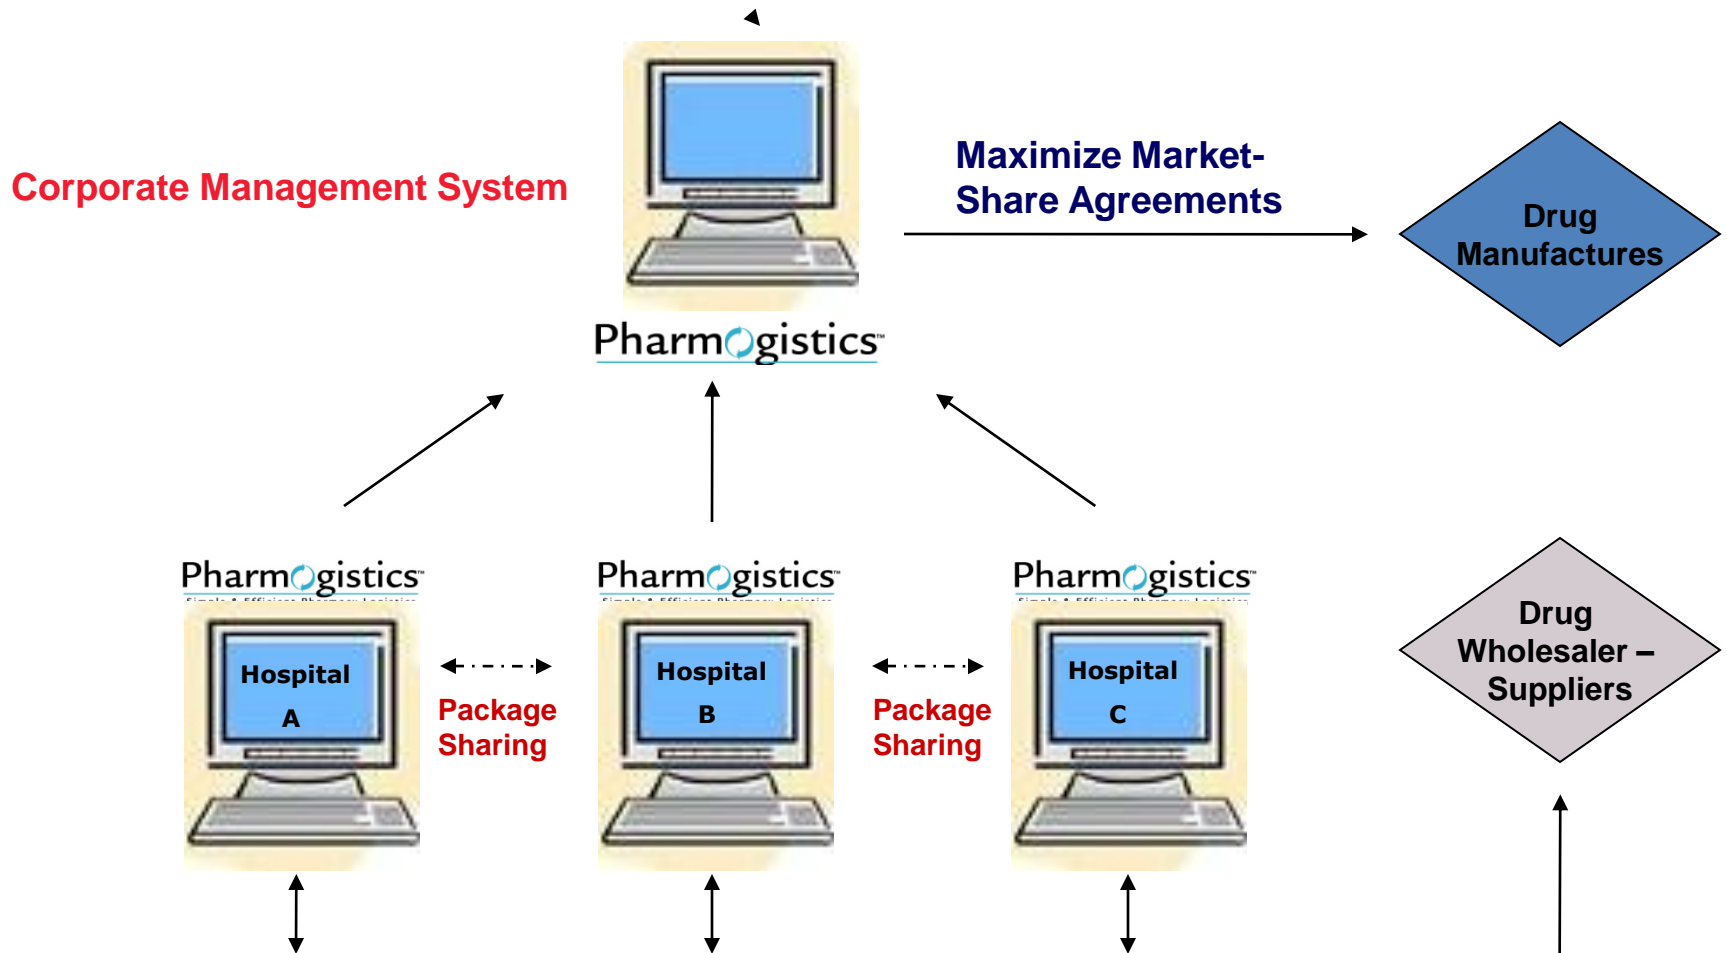

All doses dispensed are cost centered to the final destination and ready to post to the GL or financial Program.

Remote orders are created and sent to the central pharmacy via a web-based order form. Package Sharing Is built into the smart sort within Inventory Manager

Full case packs ordered are sent along with the unit dose product picked in the pharmacy to the remote locations. Package Sharing occurs and eliminates expired meds.

# Corporate View Reporting

**Package Sharing** allows for less “case pack” inventory to be purchased from the Wholesaler resulting in significant savings.
